PROJECTS

Aptech E-Project (Dynamic Site)

📅 05/2022 - 06/2022

Work

- I have created an E-Commerce Website of shoes which have every functionality offered by any real world E-Commerce website
- Used PHP for the functionality or backend which also clears that I use MySQL database for user authentication or product carts or history etc
- For UI perspective used Bootstrap 5 to stay in the latest game of User Interface

Aptech E-Project (C#, .NET Application)

📅 01/2023 - 02/2023

Work

- Created a fully customizable website for Real Estate, the best example would be Zameen.com as it was used as our reference source
- User complex models and controller functionality to get the best outcome
- With C# I used MSSQL to get the dynamic data talking in my site
- Used Bootstrap templates for UI

EXPERIENCE

Web Developer

Cybarrier Solutions Pvt.Ltd

📅 03/2022 - 07/2024 📍 Gulshan - e - Meymar, Karachi

WORK

- I work as a dynamic developer whether the work related to any server side language or with JavaScript framework
- Created Static Templates like landing pages, email templates or copy the whole PDF design whatever required!
- Worked in Paced environment in high functional project which were demanded in short time
- I have created an Admin Dashboard for a commercial company which were handling data of their users about how many orders has been placed, their order status, done invoices or generated Invoices it was a very complex project at that time of my career but overcome it and the client was happily satisfied with the out come work with PHP and Bootstrap
- I have also created a matchmaker platform for investor, If they want to spent their investments either related to any industry they just need to adjust few filters (i.e Dropdown Options) and the datasheet will automatically shows what are they (Clients) trying to find, In that particular project I have also use the AI for advising the Investors to which is their best shot for Investing as the I set the code that It analyzes all the datasheet and give the best options which lies in the User expectations.
